Rosewood on white

Antique Oak on white

A new generation of windows for a warmer, more welcoming home

THE PROFILE22 70mm system is the perfect replacement for old timber frames, or inferior quality PVCu and aluminium windows.

Its attractive, double bevelled PVCu profile is designed to mimic the look of a timber frame and its 70mm depth matches the measurements of old wooden windows.

Rigorously tested to withstand the wind, rain and extreme temperatures, and subjected to stringent quality standards, the 70mm system is ideally suited for the inclement conditions of our everchanging climate.

It's warmer too!

The four chamber construction of the outer frame gives it a thermal efficiency rating of up to 20% greater than that of slimmer systems. Add to that a choice of 24 or 28mm double glazing and you'll soon start to see a saving on the costs of heating your home.

Building regulations
Document L* compliant

Used with the correct glazing specifications, PROFILE 22 windows meet the improved energy efficiency requirements of the government's new Buildings Regulations **Document L***.

*Document J in Scotland *Document F in Northern Ireland

Improved protection and… the perfect fit

The PROFILE 22 70mm system accommodates multi-point locking mechanisms that help to safeguard your property and personal possessions from possible break-ins.

A recent British Crime Survey conducted by the Home Office has shown that security devices are effective in reducing the risk of burglary

Enjoy the benefits of a warmer home with PROFILE 22's 70mm PVCu window system

Out with the old and in with the new: improve your outlook with better looking windows that are guaranteed to last

The best windows, doors and conservatories are made from PROFILE22
